Projects

Bookstore management system with genre filters / *Responsive Web Design* **April 2025**
- Developed a fully functional Bookstore Management System using HTML, CSS, JavaScript, and PHP with a modern, responsive UI.
- Used PHP for backend logic including managing book inventory and handling form submissions.
- Implemented genre-based filtering to allow users to browse books by categories such as Fiction, Non-Fiction, Romance, Thriller, etc.
- Applied DOM manipulation and event handling in JavaScript for real-time interaction and filter updates
- Deployed Link: **bookstore4u.infinityfreeapp.com**

Portfolio Website / *HTML,CSS, JS* **Feb 2025**
- Designed and developed a responsive portfolio website using HTML, CSS, and JavaScript to showcase personal projects, skills, and achievements.
- Implemented a modern UI/UX with smooth transitions, interactive elements, and clean layout using CSS animations and flex/grid layout.
- The website is structured with clear navigation: Home, About, Skills, Projects, and Contact sections.
- Github Repository Link: **https://github.com/Anu2024-coder/My_Portfolio**

AI Telemedicine Bot / *HTML,CSS, JS,Python* **April 2025**
- Integrated Open Street Map Nomination and Overpass API to fetch real-time hospital data based on user location and display nearby healthcare facilities.
- Designed a responsive UI with light/dark theme, chat history, and user-friendly interaction using DOM manipulation.
- Github Repository Link: **https://github.com/Anu2024-coder/AI-Telemedicine-bot**
